SUSTAINABLE DEVELOPMENT DEPARTMENT

Sources:
The sources for the report include the water and sanitation district layer file in GIS, Assessor's records, Douglas County Planning Services Division databases, Douglas County Building Division records, and City and Town building records. None of the sources specifically identify a list of properties served by domestic wells so some assumptions were made in attributing the housing unit records to water service providers. All platted subdivisions, with housing units in water and sanitation district service areas or mutual water company service areas, were assumed to be served by public water providers. All unincorporated areas with housing units in a service area were assumed to be served by domestic wells. All properties with housing units, located outside water and sanitation districts or mutual water companies service areas, were assumed to be served by domestic wells.
